

How to *ship the item* with **Direct Shipping**

1. *Prepare* your package

Choose packaging according to the size of your item, and make sure it's well wrapped so the item will be protected.

Check that you have included everything from the online item description in the package (dustbag, certificates, receipts...).

2. *Print* the prepaid shipping label

Print the prepaid shipping label (page 3).

Stick it on a flat surface on your package (the barcode has to be scannable).

Make the most of the space left for you on page 4 and leave a little note for your buyer. Don't forget to enclose the page in your parcel.

3. *Send* your package

Your package will be taken care of by DHL.

You can either drop it off at any DHL store or schedule a pick-up from your home.

For more details on these two options, go to page 2.
